Last name: Wasserman

Organization:

Title:

Comments: Where to start? With the gutting of the already inadequate protections of clean air, water, and land afforded under NEPA? With the disrespect the proposed Project shows to the citizens of Georgia and the United States by trying to avoid meaningful public disclosure and public discourse about the Forest Service's Plans for the Foothills area? With the harm to water and wildlife the proposed application of herbicides to huge swaths of the land? With the ill-conceived plans to build unnecessary roads into some of our last wild and untouched natural treasures? With the plans to clearcut large numbers of old growth trees that provide important canopy and sustain the habitats of the forests? None of these destructive acts are necessary for the long term best management of the forests and will permanently scar their beauty and their sanctity. I urge that you not undertake this project.
