Title:

Comments: Our public lands are for public use and enjoyment. I firmly believe the public should retain a say in the use of public lands. No de-forestry, no un-reasonable access restrictions. Save our treasures for our children and grandchildren. De-forested lands take 50yrs. or more to recovery if, at ever. We have many endangered plant species within the Chattahoochee National Forest that should be protected and preserved. De-forestry our national forest for profit..could leave us with us with an eye sore, a lost of a state treasure that very likely would never have the same diversity and beauty ever again.
