First name: Chandra Last name: Coffee Organization:

Title:

Comments: Our public lands are for public use and enjoyment. I firmly believe the public should retain a say in the use of public lands. No de-foresting, no un-reasonable access restrictions. Save our treasures for our children and grandchildren. De-forested lands take 50yrs. or more to recovery if, at ever. We have many endangered plant species within the Chattahochee National Forest that should be protected and preserved. Deforesting our national forest for profit..could leave us with us with an eye sore, a lost of a state treasure that very likely would never have the same diversity and beauty ever again.
