Comments: I am very concerned about the fact that this Foothills Landscape Project as currently formulated will not allow the public to utilize the established NEPA process at the time site-specific locations before treatments are being established.

The Forest Service should NOT RUSH their new planed Foothills Landscape Project and allow for enough time to do a complete environmental impact assessment. History shows that fixing environmental mistakes is usually too costly or too late or both.

Also, the public should have details on where exactly the planned activities will take place and have time to comment on a well developed proposal, as well as have time to plan their own recreation activities according to this plan.
