Title:

Comments: Please don't circumvent - potentially illegally - the public input process by imposing this project with its blank check of vague outlines and limited transparency. I grew up around the forest up in the Chattanooga area, and we still visit thirty years on. I ask that you continue to offer specific plans for use and open those for comment as they are identified, as opposed to hiding behind a blanket permission slip for corporate misuse/abuse of public lands.

Many thanks,

Ken
