Comments: Foothills Landscape Project #52509

The Forest Service Project would affect an untold number of people, who visit this area solely for the recreational opportunities available to them. Hunting, fishing, hiking, and other outdoor activities will be impacted if this project moves forward.

This area is an impoverished area to begin with, & the communities need all the funding available from the tourism that these recreational opportunities provide.

We urge you to consider the devastation that project #52509 will bring to these affected communities.

Sincerely,

Glenda Higdon
