Comments: I oppose so many of the proposed ideas in the Foothills Landscape Project that this space is inadequate to list them. First the insulting "public comment" allowed only before you notify the public as to the location of the forest service plans to burn, log or apply herbicides is or should be illegal. Logging 60,000 acres of the Chattahoochee National Forest could be ruinous to the clean water streams and ecosystems in the Foothills if not done with care. Excluding the public's knowledge and input from each of these activities (logging, burning, applying herbicides) is a PRIOR ADMISSION that the best practices of forestry will NOT be followed and the MISSION of the forestry service will be DISREGARDED.
