First name: Trinity

Last name: Silva

Organization:

Title:

Comments: Could any moneymaking organization for once in their lives think about the environmental repercussions of their actions? I understand that you need to cut down trees but is there no way to do it unless your taking where people enjoy their free time and native flora and fauna flourish? Do you donate to replantation? Do you clear invasive species only? Is America just going to turn into a paved lot? I disagree with what you are doing. Go away.
