Comments: The public needs to be able to have input into these projects in the Future (not just the portion that is about to close). These forest that you plan on mowing down are where I currently go to clear my head. The public needs to be able to have input on where and how many roads, and timber is going to be cut! Some of the proposed areas are some of the last pristine areas in the state. The usfs needs to be held accountable for there plans, actions and inactions.
