Comments: To whom it may concern,

As a native Georgian, the Chattahoochee National Forest played a huge role in my life. In these lands, I learned to love the outdoors, both by trail and by river/creeks. This love for the outdoors lead me to my profession and livelihood of landscape photography.

Please do not proceed with this plan to open our precious forests to unrestricted road-building activity without public input. These are public lands, not the property of logging companies, and should be treated as such, with continued public input and balanced use for logging, hunting, recreation, and preservation.

Thank you
