First name: Angela

Last name: Earls

Organization:

Title:

Comments: Please do not abolish or amend the black footed ferret reintroduction area. These are endangered animals and they are struggling to survive. As a ferret owner of many years I can tell you that they are extremely fragile creatures. They are NOT hearty and do not reproduce with ease. Many attempts have been made to start ferret sanctuaries and almost ALL have failed. Please give these nearly extinct creatures a fair chance to hang on to survival.
