Title:

Comments: This proposal represents a blatant attack on the United States. America is a land of resources and natural beauty is becoming one of America's scarcest assets. Your proposal to destroy the last bastion of nature in the Eastern United States represents a treasonous act upon the people and the wildlife of the United States. This proposal if it passes will be facing immediate legal action, and the politicians who are responsible for this destruction of our land will not be re-elected.

Sincerely,

The Voice of the United States
