Comments: Dear Sir

My biggest concern regarding the Foothills Landscape Project is one of process. You are asking for comment on non-specific project. More precisely here's why: In the past, the Forest Service has decided to drop an average of 243 acres of timber harvest from each project in order to avoid harms identified by the public to wildlife, soil, water, rare species, roadless areas, recreational opportunities, and old-growth. Those improvements would not have happened without public knowledge, involvement, and scrutiny. But with the Foothills project that public involvement will be sidelined. The public's tools for oversight of the government, the NEPA process, will be completed and no longer in place, right as the Forest Service is making decisions about exactly where their management projects will occur. Please put the NEPA process back into the Foothills plan. Commit to real collaboration with the public about site-specific management decisions.

The forest is a place we all share and we all need an opportunity to participate in its care.

Sincerely

Arch Lamb
