Title:

Comments: As an avid wilderness lover, I feel that the Foothills Landscape Project #52509 is not in the best interest of nature lovers. As you are well aware, our eco-system is in jeopardy of a total collapse. Herbicides and pesticides have been shown to not only harm beneficial plants and insects, but to also cause various cancers. I ask that you reconsider this project and to display all documentation for the various work, including the "temporary roads" (which is in no way true because once a road has been cut, you can clearly see where it was), for the public to view.

Sincerely,

Deryle Lee Baldwin
