Comments: I have seen at Dry Creek Trail System after established trails put in at a cost of over \$100,000 of taxpayer money the yellow trail was completely destroyed by logging then a burn that completely ruined that trail for years now overridden with horrible brambles. The trails were supposed to be installed with enough for a Bushhog without public input single track for horse, bike and hiker use ! This is an example of what doesn't work ! Please keep a buffer off of the trails for Clear cutting and if should be part of a burn come back and remove trees killed by the intense heat. Thank you a taxpayer and neighbor
