Comments: I do not approve of any such wide action in our National Forests without some open forums for the public. AND comments and opinions of the public should be taken seriously into consideration. This proposal destroys too much of our precious forest land to be acceptable. Regeneration of old growth hardwoods takes many years and that is one of my reasons for opposing clear cutting - which is done all too often. Trails and campsites are part of the public's access and should continue to be maintained. While I do not disagree with prescribed burning, I do not understand the grinding of wood chips on such a massive acreage. I also would like an explanation on the "undisclosed" number of new roads. We need public disclosure and reasonable explanations.
