Comments: For finalizing the Foothills Landscape Project, PLEASE fix the process you have set in place for these drastically important decisions-!

I am extremely concerned that we, the tax-paying public that pays your salaries, will pay for this project, and will have to live with the outcome of your decisions do not yet have the specific information from you to fully understand what your actual actions will be.

There is a way to fix this: reinstate and follow the NEPA rules-!

When you legally need and have asked for public comment, you must FIRST give us the details-!

Hold everything- extend the deadline for public feedback until your specific plans are published, then fully review all the comments that come in from us, your stakeholders.

Once cut, our beautiful, some ancient, trees will not grow back in our lifetimes. When burned, the forest will not recover in our lifetime. If poisoned, the forest will not recover, possibly not ever.

Do not close out the public while you work in secrecy. This is probably not legal, and it is not right. Be our excellent Forest Service public servants and do this right-!
