Title:

Comments: I just found out about your proposed Foothills Landscape Project that involves a total disregard for the concerns of those who will be most impacted. As caretakers of this earth, we, as humans, are responsible for maintaining and protecting our environment for ourselves and future generations to enjoy. This includes the habitats of the animals and plant-life that would be affected. Please reconsider your intentions of going forward with this project and accept your responsibility as stewards of nature. Do the right thing.

Thank you.
