Last name: Nortje

Organization:

Title:

Comments: I think it's important for the public to know the details of the proposed project in the Chattahoochee National Forest which includes:

1. Allow for 60,000 acres of commercial timber harvesting;
2. Apply herbicide across up to 74,500 acres
3. Reroute up to 111 miles of trails; and
4. Build an undisclosed amount of "temporary" roads.

This is after all public land and so it's important for the public to know what is being done with their public land. I live in Atlanta, love to be in the outdoors, so this is important to me.

Please let us, the public, know the details of this project.

Thank you

Andrew Nortje
