Comments: Greetings,

I am writing this letter to express my extreme disapproval with this proposal to close out a large portion of Georgia's public lands from promised public oversight for years to come. Given that "The Forest Service values public participation," I do not understand how this Foothills Landscape Project is in keeping with that claim. We have the right, as citizens of Georgia and this nation, to weigh in on proposals to take actions with potentially significant environmental consequences in our treasured forest lands. For the sake of our environment and our nation, I urge you to reject this proposal altogether.

Thank you for your attention to my urgent request.
