Comments: To the US Forest Service,

I am a resident along with my husband in Fannin County, Georgia. We oppose you moving forward with the Foothills Landscape Project 52509 until the public has been informed of which specific areas would be included in each proposed action in the project. We need full information on the environmental impact this project will have on the Chattahoochee National Forest. This land belongs to all of us, and we need assurance this project is in the best interest of preserving and protecting our precious resources.

Thank you.
