Comments: To whom it may concern,

Please consider taking the public's opinion on the foothills landscape project - 52509.

I am always tremendously saddened by the power company's need to clear all trees from below and near the power lines. I've lost privacy to my home, childhood black berry patches and the subsequent pies and jams made from the wild berries, the faith to fish in my own creek due to the herbicides sprayed beneath the lines. Private land owners do great injustice to our local forests to line their pockets while their neighbors mourn for the shade of the trees and the sanctuary for the animals. Caring for government land is a big responsibility and I imagine a great opportunity, but I ask you to allow those of us who enjoy it to maintain our voice and to have some say in what may be treated, logged and/or burned. I understand that these things will need to happen, but please let those of us who use and love it continue to have a say. Many thanks for the work that you do.
