Comments: Everywhere we turn, livestock grazing is being put above the welfare of every species of wildlife in our country. Our wildlife was here long before these livestock and should come first. I have no problem with our wildlife SHARING the land, but what I DO have a problem with is our wildlife being put out to make room for cattle and sheep. There should not be 1 single prairie dog or ferret killed. I'm not familiar with this plan and I'm not sure what the proposed plans are, but I am against ANY native wildlife being injured for the sake of livestock grazing. Thank you
