Title:

Comments: As a neighbor in Tennessee north of this critical Landscape Project, it is critical that our ancient forests be cherished for their value and not destroyed mindlessly in unreasonable madness for "progress" that is avarice in disguise:

No to U.S.Forest Services labeled Foothills Landscape Project last December.

No to 60,000 to 80,000 acres of "harvesting" commercial timber, 50,000 acres of burning, 360 miles of bulldozer paths to accomplish this.

No to HERBAL dosing of 74,500 acres, decommissioning trails and camping area.

NO.
