Title:

Comments: I'm not sure what is being planned, as the FS language is very vague. What actions will be taken to "maintain or restore biologic integrity, connectivity, resilience, and soil and water quality on the 157,625 acres of the Foothills Landscape"?

At any rate, I am writing to urge that the forest be left undisturbed. Forests survived just fine without human intervention for millennia, and will continue to do so if left to their own devices.

Respectfully,

Laura Garren
