Comments: As an avid user of this system of national forest, I am concerned about what appears to be the removal of public input from commenting on USFS activities after this project goes into effect. There should be no removal of public input on large scale, planned USFS activity where use of the national forest is impacted...by all users of this resource including landowners and recreational users. I am primarily concerned about what appears to be an increase in favor towards commercial activity by the USFS. This is a national resource, supported by taxpayers, and citizens should be queried for their input prior to any commercial engagement.
