Comments: Hello, the trails in these areas, especially the Pinhoti trail system is the reason that I travel to Georgia for hiking and biking. I even had a chance to talk with the Army Corp of Engineers about how much money is brought in to the surrounding communities by hikers and bikers. The Foothills Landscape Project could negatively effect these trails that could take years or even decades to recover from and that will also effect those communities. The users, community leaders, experts, citizens should all have a voice in this. Please consider before passing. Thank you.
