Comments: I think this should be a vote for the ones that live in the counties that are represented in this proposal. There should be more done with what's already available for the public access. We have enough to deal with in my area of the Cohutta wma the trash and vandalism is monumental and is a constant struggle for residents to have to clean up. I live at the foot of Grassy and travel up and down on a regular basis and I never have been able to come off the mountain without a bag of trash. Let's fix what's already available before opening up more to be trashed. Thank you
