Comments: I am in favor of any management practices that will help to restore the National Grasslands ecosystem to a healthier state - more like it was before the western European expansion (pre mid 1800's) when the Prairie Dog was an important member of the great grasslands ecosystem. Therefore anything you can do as good managers of this land that will help the balance of all wildlife, including the Prairie Dog, would please me. Thank you for this opportunity to express my opinion.
