Comments: I am an avid user of the Chattahoochee National Forest. I whole-heartedly support the Foothills Landscape Project.

I use the Chattahoochee National Forest for many recreation purposes, including, hiking, backpacking, mountain biking, and hunting. It is apparent to me that much of its plant and wildlife diversity has been choked out. It is exciting to see that we might have an opportunity to improve the ecosystem and wildlife habitat that the forrest provides.
