Comments: As a teacher I use a lot of the areas that fall under the project and am always open to improving access not only for me but for Forest Service to help maintain. As an outdoorsman, I understand how important a forest is that has different stages of growth and to keep different ecosystems and this project would do just that. I have traveled many parts of the world and have seen the damage and loss of habitat, animals, insects, birds, reptiles because of mismanagement of those resources so I ask those concerned to allow the project to go forward.
