Comments: This forest needs help. This forest has been on a decline for years and needs the state and or government to step in and help our forest. Wildlife is on the decline deer,Turkey,Grouse and small game as well as trout species ect. If improvements is not made on the timber and landscape this forest will continue to decline and will at some point just be dead and chocked out by itself. Please find a way to help the forest we're people can enjoy it and our younger generations can enjoy it. The state needs to make this a top priority. Anytime or anything I can help with I am ready and willing as I want to see the important improvements made for the sake and life of this great National Forest.
