Comments: I strongly encourage you to begin the effort to increase the wildlife habitat in North Georgia, Alabama and Tennessee. Most of these forest regions are virtual deserts to wildlife with seemingly endless acres of trees blocking out forage vegetation.

There are hunters such as myself who would be willing to assist in these efforts. We wish for more/better law enforcement and wildlife management, not less. We have seen that neglect and "hands off" policies only bring wild fires and declining wildlife populations to our beloved mountains. Anyone can easily see there are far more deer living on the edges of state highways than in the thousands of acres of forests nearby; and sunlight/food is what draws them there.
