Comments: I truly miss trout fishing the streams in North Georgia. It seems every time we go the large pools in the streams they are filled with people swimming or sunbathing. Not fishing.... I understand that these are public areas but they should be designated for hiking and fishing only. These people leave the area filthy with dirty diapers, food containers, beer bottles and a bunch of other junk. They have no concept of nature and I really wish something could be done about it. It is destroying our creeks and making a mess of the natural areas. Please take into consideration the people that do want to use the streams to fish and hike.
