Comments: This does sound exiting. The hunting experience in this area has, IMHO, been on the decline for years. As a senior citizen I am looking forward to too the efforts to enhance our wildlife, both game and non-game in the future. This would include wildlife food plots and such management as to increase the number and quality of game, particularly the whitetail deer and black bear. I would love to see the introduction of elf also if the area could support the animal. From other close by states it seems that it would.

Thank you!
