Comments: I have been hunting the national Forest land's in Habersham Co. All my life and have seen a steadily decline in wildlife in general, especially over the past 10 years. Deer seem to going to more rural areas where fresh brouse is more abundant. The Foothill's project would benefit all the wildlife in so many ways. I travel and hunt WMA which is national Forest land in middle GA and their they select cut, clear-cut and undercut the forest and the wildlife population is thriving. So I think it would be great if we could get some help up in the North Ga MTN.
