Comments: Please help our wildlife by having forest management of removing several acres of trees per year to help the uptake of young wildlife. This will increase cover for wildlife and stimulate new browse food for wildlife.

Our Forest are to be allowed to house wildlife not to be managed until there is little cover or food. Preserving trees is fantastic but having an unhealthy ecosystem to preserve one species doesn't make sense.

Treatment for insects of threats to trees should be part of this management. Providing safe environmental access by improving the infrastructure is essential for all citizens to enjoy.

Please make these changes to the management of this wonderful piece of land. I grew up camping on this land camping and fishing.
