Title:

Comments: Regarding the Foothill landscape project assessment EA: I am apposed to the proposed foothills project. No clear cutting please, be selective about what is cut. Please do not rape the land. No need to plant pine trees they are very proliferous. Pesticides are not good for any one or any thing especially our water sources. Surely there is and environmentally safe way to achieve the end desire. Please limit the experimental expanding gap and hemloch silviculture treatments to a handful strands. We cannot cut our way to a healthy forest.

If the land is sold to undesirable business owners that will determine what kind of people will be moving here and what kind of tourist we will attract.

Surely we want to attract good wholesome families to a safe community.

Do we want an amusement town or a God fearing family save community?

Sincerely Paula
