Comments: It is regrettable and dismaying to learn that again the Forest Service is planning to dismantle and destroy pristine ecosystems in Georgia. Your service has sold, exploited, and polluted so much of OUR protected lands. And for what? Profit, use for noisy polluting ATVs, busy roads , and logging and mining. This is NOT what these buffer lands should be or need to do. That is what Private landowners can do, and YOU should NOTbe.selling OUR lands to profit the government either. This "project" should NOT go forward! NO.
