Comments: I am temporarily located in Idaho for a few months due to work, but I have spent my entire life in Georgia and am moving back in 4 months. The Chattahoochee National Forest is very special to me and I regularly use it for hunting, fishing, bird watching, hiking, camping, etc. I am in full support of alternative 2. Our forests need management. We owe it to the wildlife to provide quality early successional habitat. Native Americans actively managed these lands for thousands of years. It's our turn to provide a home for the critters that we share these forests with. Thank you.
