Dear U.S.F.S. - I am writing in regards to your proposed changes to the way you manage Prairie Dog populations. I urge you to preserve some pristine Prairie Dog area. There are fewer and fewer area in Wyoming that are not managed for the benefit of cattle. The Prairie Dogs habit is pristine and many other species benefit from them. I have hauled frac sand in the eastern Wyoming areas and spent many hundreds of hours on the back roads and have seen virtually no Prairie Dogs. Thiis animal is as important as drilling or cows. Thank you,
Chris Dibble
