Title:

Comments: Please do not proceed with this project under the current conditions. Without a more detailed plan about what you plan to do where, it is impossible to comment intelligently. How is it possible to form an opinion of your plan when you are not clear on where you plan cut trees, apply chemicals, build new roads and structures, etc. ? The integrity of this project depends in part on the integrity of the public review. At this point, it appears there are too few specifics available to the public to support a meaningful review. Thank you for your consideration of my views on this project.
