Comments: [Dear decision makers,

For over 40 years, my family has hiked, backpacked, camped and fished in the amazing lands of the Clearwater Basin. We have seen deer, elk, moose, wolves, a wolverine, goats, bears and all kinds of birds, wild flowers, fern groves and towering trees.

We have walked through streams teeming with spawning kokanee salmon. Quietly hiked through the fragrant forests and stood in awe of the huge expanses of green. We have soaked in the peace and serenity of these wild and beautiful places which have enriched, and to some degree, formed our lives.

These lands are sacred places that must be preserved forever so that anyone who needs them can go there and return a richer and more fulfilled human being. Please protect the wild forests and rivers of the Clearwater Basin.

Thank you,
