First name: Chandler

Last name: Dangle

Organization:

Title:

Comments: I am in full support for "Alternative 2" which will allow the forest to be properly managed for wildlife habitat. Native Americans managed our lands for early successional habitat for thousands of years using prescribed fire and thinning. Humans have played an integral part of shaping habitat in Georgia for at least 15,000 years. It's our turn to provide a home for our wildlife.
