Comments: Dear Supervisor Jewett, I have revered and treasured the North Georgia mountains for more than 60 years. I am deeply concerned by the plans for the Foothills Landscape Project. Please do not deny the public the opportunity to comment and to be informed through the NEPA process. Please do not log the forests, spray herbicides recklessly, or build more roads. These forests belong to the people, not to loggers. Leaving the forests in the most natural state possible is the best policy. Thank you for protecting our beautiful mountain forests.
