First name: James

Last name: Serra

Organization:

Title:

Comments: I am in favor of sensible forest management practices that protect the natural environment and all of the creatures that thrive in that environment while providing access to the public lands by outdoor enthusiasts. Protecting old growth forests from fire, maintaining roads and preventing erosion of sediment into the streams should be the focus.

Enhancing fish passage to seasonal watersheds should be provided wherever possible.

Riparian buffers should be protected in the watersheds.
