Title:

Comments:

I don't think the forest should be given this# much power over our forest without input and more public notice about what they intend to do.

They have closed roads thru forest that have been used by the public for years and are now closed which greatly limits the public use of the forest for the recreation and enjoyment for which the forest was set aside for. Very heavy handed and using the power that they know what is best leads to an overreaching and corrupt organization limiting the public use to what they decide is best
