Comments: This plan, Foothills Project 52509, is a terrible idea and I strongly urge you to research this project before moving ahead. Entire ecosystems will be needlessly wiped out just for the opportunity to line federal pockets with timber money. We cannot just destroy parks for a few nickels. Think of the wildlife we could lose. Think of the lack of tourists after the forests are destroyed. Make your money elsewhere and leave the parks alone. No timber, no fires, no pesticides. Keep America beautiful.
