Title:

Comments: Good Day,

I am very seriously opposed to the scale and to the techniques being proposed here. The heavy equipment and the over extensive clear cutting will do irreparable damage to the watersheds and to the environment of this very fragile area. The damage done to the Chattooga Wild and Scenic river alone is cause to stop this, but this proposal does even greater damage. The practice of applying herbicides and pesticides after the clear cutting should not only be not allowed, it should be regarded as a criminal act. In the more environmentally aware countries of the world, it is a criminal offense..

Please do not allow this harm to be done to a vital and important ecosystem.

Thank You

David Dostall
