Title:

Comments: As a citizen who spends countless hours in the North Georgia Mountains fishing, hiking, and exploring, I fully support any actions that can be taken to enhance the landscape and promote wildlife growth. I especially support the building and repairing of culverts to help the wild trout population that is already on the verge of collapse. My one wish would be that this project help open more Forest Service roads to the public as one of my personal joys in life is riding around exploring in my Jeep.

Thank you
